Crafting Tomorrow's Web

From Student to
Software Developer

For BCA, B.Tech, BSc IT, MCA, and Diploma Students

SURAT PILOT BATCH 01

12 Weeks | Full-Stack | Limited Seats

Apply Now: +91 70697 85900 | www.exotech.co.in

REAL-WORLD PROJECT

Work as part of a development team to build a complete business application.

INDUSTRY WORKFLOW

Understand requirements, task planning, development cycles, Git, GitHub, code reviews and documentation.

TEAM COLLABORATION

Experience how developers, team leaders, mentors and testers work together to deliver software.

MODERN TECHNOLOGY

Work with technologies such as React, Node.js, REST APIs, PostgreSQL, GitHub.

TESTING & DEBUGGING

Learn to find problems, understand bugs, improve code and make applications reliable.

DEPLOYMENT

Take your project beyond your laptop and understand the journey from development to deployment.

THE INTERNSHIP JOURNEY

A structured 12-week industry simulation designed to move you from theory to a working, deployed project.

Week 1-2: Foundation & Real Workflow

- Development environment setup and project installation
- Git, GitHub, branches, pull requests
- Codebase reading and project architecture
- Understanding a real-world project structure
- Daily standups and issue tracking

Week 3-4: Database & APIs

- PostgreSQL schema design
- SQL queries, joins, and indexing
- REST API design and error handling
- Authentication and role-based access control (RBAC)

Week 5-8: Frontend & Backend Development

- React + Vite frontend development
- Node.js + Express backend integration
- Real bug fixing and feature building
- Team collaboration through GitHub
- Code reviews and pull requests

Week 9-10: Testing, Security & Performance

- Writing unit and integration tests
- Debugging complex issues
- Security basics: JWT, validation, CORS
- Performance and query optimization

Week 11: Deployment & Documentation

- Deploy backend to Render/Railway
- Deploy frontend to Vercel
- Environment variables and production config
- Technical documentation and project report

Week 12: Final Evaluation & Viva

- Team project presentation
- Technical viva and code review
- Mock technical interview
- Mentor evaluation and skill scorecard
- Internship completion certificate

- ☑ Most students know programming concepts but struggle in real development environments. Exotech bridges that gap through real projects, mentorship, Git workflow, APIs, databases, testing, and deployment.
